

Mechanical Specifications

Meets ANSI Dimension Requirements
Stainless Steel
Universal Left and Right

Detail

Features

- The heavy duty stainless steel band is made entirely in the USA.
- Front and back walls of the band are smooth and sized per ANSI standards for consistent performance.
- Extended finger-grip screw head and bracket are corrosion-resistant zinc with installer-reversible screw for left or right operation.
- Multiple tightening tool options: 3/8", 10mm, 5/8" six-point, and 15mm twelve-point sockets, plus slotted screwdriver.

The sealing ring features smooth threads and large opening for easy installation while maintaining the strength and long-term durability that metering operations demand. It also features an optional area for barrel or pad lock. The extended finger-grip screw head allows for easy hand tightening, and the reversible screw design eliminates the need to inventory left and right versions. The sealing ring is easy to install and hand tighten, making it one of the most versatile sealing rings on the market.
